Nevada City Nugget

VOLUME III, NUMBER 2 THE GOLD CENTER NEVADA CITY, NEVADA COUNTY, CALIFORNIA, THE COUNTY SEAT PAPER NOVEMBER 26, 1928

SIERRA CITY MINES LOOK PROMISING

Many Properties Undergoing Development Preparing for Large Time Production

Predictions in previous issues of The Nugget that Nevada county and adjoining counties are destined to quickly come into their own with the mining operators and their investment followers, seem in a good measure on the way to fulfillment.

Even though the two counties of Nevada and Sierra have produced many more millions in gold than the total production of the Klondike and Yukon together, it has long been an admitted fact that quartz mining in this section has hardly been scratched.

The influx of engineers and eastern operators weekly through this district certainly warrants some-thing and the many mining transfers lately recorded would imply just recognition of this highly mineralized belt.

Late reports from the Sierra City district state that in driving a raise from the No. 3 level on the Bigelow property, recently acquired by Long Beach and Colorado interests, a very rich shoot was encountered, the vein at this point being about three feet in width and assays taken running very high. The mill on this property is now running at capacity.

The Monarch Alconda Consolidated Mines Inc., who just recently purchased the well known Monarch Mining group totaling 843 acres adjoining the Sierra Buttes property famous for its production in excess of 20 million dollars over the past few years, are calling for bids on three miles of power line to run from the power plant on the Yuba River to its present mill location. The steam hoist, compressor, etc., are to be replaced with electrical equipment immediately this line is completed. The capacity of the mill is being increased and will handle tonnage through a shaft that is to be sunk from 342 feet to 550 feet to under cut a rich shoot encountered when sinking a winze on the 342 foot level.

Further developments for this property are quite extensive, including additional housing facilities and a new 60 stamp mill on the south side of the property at a elevation 2000 feet lower than the present mill location, enabling a gravity feed system driving in on the ledge and the known pay ore at such point, thereby developing better than 1800 feet of backs over a 2 mile length. This operation will cut mining and milling cost practically in half. The ledge at this point is exceptional in that it runs approximately 24 feet in width.

The Monarch Company are strongly entrenched financially with eastern interests, and the secretary of the company, Mr. J. Wesley Platt, is on his way at the present time for an inspection of the property and approve a two year development program.

In this same section the Primrose property, even though handicapped by weather conditions is going right ahead carrying out their winter program. Seattle financial interests are backing this development.

The Young America in the Gold Lake territory, already with several is also carrying out extensive new million production to its credit development work.

SCHNEIDER GETS TRUCK RIGHTS FOREST SPRINGS

A decision by the state railroad commission granting permission to Schneider Brothers of Auburn to operate a freight service between Auburn and Forest Springs, a service station just south of Grass Valley, in connection with their Auburn to Sacramento line, took Nevada City and Grass Valley by great surprise the past week as it means active competition for the narrow gauge railroad serving the two communities. The railroad officials were non-plussed by the decision as it is an evdent fact that Forest Springs and the territory south do not offer any attractive business for a truck line. The request of the Schneiders to operate a line form Auburn to Colfax was denied.

SALMON MINE, BADGER HILL BEING DEVELOPING

Mr. Hill of the Parnall Mines Corporation, and party were at the Salmon mine Thursday and seemed well pleased with the work being done at the mine. Mr. Hill is the financier of this mine. They started unwatering the shaft that was put down last fall and winter, on Sunday and finished unwatering it on Wednesday and put in a pump to take care of the water. They intend sinking the shaft to a depth of 200 feet and then cross cut as several places. At present the shaft is down 90 feet. The mine was closed down during the war by Mr. Charles Salmon, after taking out some very good ore. There is every reason to believe that there is plenty more and it will only require repth to strike the pay vein. Mr. Leadbetter is in full charge of the operations and is making a good showing. He was at the Rand mine in South Africa for twelve years, prior to coming here.

INDIAN HILL HYDRAULIC MINE IS TAKEN OVER

The Indian Hill hydraulic properties above Camptonvlile have been taken over under lease by D. W. Shanks and W. F. Camp of the Frank S. Morgan Company and are preparing to start operations as soon as the water is ready.

The gravel bank is to blasted out and made ready for the monitors. The sluices will be gone over and put in condition and water is expected to be turned in after the first of the year. P. H. Leonard has been in charge of the property for the past three years and will doubtless be connected with the new en terprise. There are approximately eight million yards of gravel yet to be washed. Millions of yards have been washed in past years.

Mr. Shanks, who is one of the moving spirits, is well known in this section.

HENRY SNYDER HAS A CLOSE CALL IN SNOW

Henry Snyder, who is operating the Beauty mine at Canada Hill above Westville in Placer county was caught last week by the snowstorm with seven of his crew at the mine, and they had a hard time breaking a trail out to civilization. With four feet of snow ahead of them on the level to clear for the truck, progress was extremely slow. They were seven days making the trip of 24 miles to Forest Hill.

MRS. JOE OSMAN IS LOST FEW DAYS LAST WEEK

NARTH SAN JUAN, November 22, (Special to The Nugget)—Quite a bit of excitement was caused by the disappearance of Mrs. Joe Osman, aged 65, the other night from her home at Freman's Crossing, near here. She started out for a walk into the woods and when she failed to return at a late hour searching parties were organized and set out in different directions. Owing to her advanced age it was feared that she had become exhausted.

Telphone calls placed by PJostmaster K. J. Fogarty sent out searchers and Will Clerkin of Pike found Mrs. Osman plodding along the road on her way home, apparently no worse for her experience and exposure to the storm.

Charles M. Boles, aged 64, a laborer passed away yesterday morning and the remains were taken in charge by the Holmes Funeral Home. They will be shipped to Sacramento this afternoon for interment A brother lives in Sacramento.

Rev H. H. Buckner addressed the meeting of the Boy Scouts last week A. J. Rore was present to give first aid demonstrations while Hugh Clendenen gave some rope tying instruction.

Mrs. William Reynolds, who has been quite ill with the flu, is in the Nevada City Sanatarium.

NEVADA CITY DESTINED TO BECOME CENTER OF TURPENTINE PRODUCTION

Big Production Schedule Is Contemplated By Next Summer Ground Is Broken For New Refinery And Complete Plant Large Acreage Already Under Contract, More Taken

What is doubtless destined to become the leading turpentine producing center of the United States in the next few years is Nevada City, yet probably many of our citizens are not aware of the immensity of the plans now being consummated by the California Timber Products, Inc., which commenced the construction of the first unit of its refinery the past week in this city. Erection of various buildings will be rushed to early completion so that housing of the machinery may be started within the next 60 days.

Next June should see the plant well under way with its production schedule and it is expected that around 100 tons of raw product will be made up prior to that time while tuning up the various units. The site which fronts on the Narrow Gauge tracks in the south eastern part of the city is now being cleared of brush and such trees as will interfere with the buildings. The city trustees are constructing a 30 foot roadway 900 feet long through property donated by W. R. Martin to connect the site with the city streets so that trucking operations for bringing in the raw product will be facilitated. A crew of men has been recruited to get the buildings up at once.

The present site is 228 feet by 210 and embraces approximately an acre and a quarter. The main building for the plant will be 50 by 60 at the outset and will be two stories in height. It will house the boiler plant and refinery. There will be 60 feet clearance to the south and plenty of clearance to the north to provide for truck unloading. There will be a garage to house six cars and trucks and an office building 15 by 50. The buildings will be of frame construction and corrugated iron side walls and roof.

The plant will be a complete refinery and fuel oil will be used for firing the boilers. One interesting factor is that gases developed during the refining of the turpentine will also be used for fuel. The rosin and turpentine manufacture will firt be followed but it is possible that a lamp black plant and refinery may also be put in later.

In clearing the site Mr. F. C. Ernst, vice-president and general manager in charge of operations, is using his artistic eye to keep as many of the native trees as possible and beautify the place. Only the undergrowth and such trees as interfere with buildings and roadways are being cut. He also may start a nursery to propogate pine trees suitable for the industry, such as yellow pine, slash pine and digger pine. The site has a gentle slope to the railroad tracks where a spur track is to be installed by the railroad company and with its southern exposure the place will have plenty of sunshine.

Aside from the considerable revenue which will accure to the timber owners turning over their trees for gum tapping operations whereby the company handles all the oprations and furnishes all tools necessary, is the fire protection and reforestration which the timber products company will foster as forest fires will eliminate such timber from use. It is also planned to provide state fire protection for all tracts being utilized, the company paying the state fees for such protection and relieving the property owner of this expense.

Mr. Ernst states that he now has over 15,000 acres already under contract which will provide ample raw material for initial operations but that he will take up to 15,000 acres more of suitable timber. One large owner signed up 2400 acres the past week and numerous other have been considering the plan, doubtless waiting to see operations get under way.

Nevada county's newest industry will bring many thousands of dollars into this community in the nert few years and create a new source of wealth aside from our boundless mineral resources which will bring our county into great prominence. It will not destroy any of our natural scenic beauty which is another vital thing to be considered. By utilizing something that has been here in abundance and not previously used and making it into necessary articles of trade is creating new wealth in the community. The company which is a close corporation has no stock for sale of any kind, it has asked no bonuses or favors and has paid all it's bills as they accrued. It is welcome to Nevada City.

Mr. Ernst asks The Nugget to state that he isnot in the market for laborers at the present time, but that he is looking for a few quality men to instruct and develop into crew foremen for the various camps which will be established the coming year to harvest the gum. This will provide a steady source of employment as the gum tapping will be followed probably ten months of the year and as there will be no diminution of the supply of the raw product the future of the industry is exceedingly bright. This paper is proud to have played its part in bringing the advantages of the industry home to the timber owners and making possible the establishment of the plant.

HORSESHOE TOURNAMENT INTEREST IS RUNNING HIGH

Standing of Teams

	Won	Lost	Pct.
Christoforo Colombo	13	5	.722
Court Garfield	13	5	.722
Native Sons	8	10	.444
Odd Fellows	2	16	.111

When the games to be played this week in the horseshoe tournament are over, either Court Christoforo Colombo or Court Garfield, Foresters of America, will have occasion to celebrate Thanksgiving with a great deal of satisfaction The two Forester Courts are tied for first place and are scheduled to lock horns on Wednesday evening of this week. No matter which team wins this series it will be the turk that pays this week, and a lot of bird meat is going to leave its home skeleton and be stuffed under the hoof slinger's skins to sustain them through the hard days to come until Christmas gives them another chance to ease up and recuperate.

Games Last Week

At the beginning of last week's play Court Colombo had a one game lead over Court Garfield. The Garfield triple-threat team made good in all three games with the Odd Fellows' sinking six, although they had several thorough scares and tight pinches before the last shoe spun from a Garfield hoof for the final point.

The Christoforo Colombo crew was not so fortunate as their brothers for, in their series with the Native Son pitchers, they dropped one game of the series, and were therefore yanked back a pace in the race, which created another tie in the standings.

Last week's games completed the first third of the tournament and the dopesters are busy trying to predict the true prograss of the tournament from this time on. Unless a mighty unheavel of some sort takes place in the Native Sons or Odd Fellows camps, it looks as though one of the two Forester lodges is going to lead the procession through the gilded gate at the end of the home stretch.

We have learned that there is a probability that the Odd Fellows will import a distinguished equine chiropodist to make a careful examination of their team. It seems that there is a suspicion "afoot" that the reason their pitchers are almost hors de combat is due to a misfit of their last year's shoes. due either to their hooves or the shoes having either grown or diminished in size, hence the need for the expert.

Thomas Phelan of Shady Creek attended to business affairs here the latter part of last week.

HOTEL KICHEN GUTTED BY BAD FIRE

Fire of undetermined origin this morning gutted the kitchen of the National Hotel and the floor of the old dining room but was brought under control before it had spread to the remainder of the building. Thousands of galoins of water were thrown into the blaze.

....About 4:40 Charley Ninnis, night clerk was about in the office and heard a muffled explosion and breaking glass but the kitchen and dining room filled with such dense smoke and gas fumes from the refrigerating system that it was impossible to get near the blaze. Flames broke through to the roof several times but were quickly extinguished.

Manager Fred Worth stated that the extent of the loss could not be determined. Insurance was carried. It is expected that the work of rebuilding will be started at once.

The fire department did quick work in keeping the blaze confined to the kitchen area. The kitchen was completely gutted and the modern refrigerating plant is a mas of ruins.

ENGELBRIGHT PLANS LEGISLATION

He Will Introduce Remedial Legislation For The Miners Stockmen, Lumbermen

The departure of Congressman Harry L. Englebright for Washington on Saturday presages a busy session for the brilliant young congressman and the wonderful grasp he has on the needs of the Second District as regards its wide diversified resource estogether with his ability to put his stuff across, using the vernacular, indicates that this district will be well taken care of in the forthcoming session which opens in a few days.

Of outstanding interest to the gold miner is the movement inaugurated by Congressman Englebright for relief from burdensome income tax on the production of gold in the last session which was held up due to delays on other pending legislation .Mr. Englebright on his arrival at Washington will have immediate conferences with the ways and means committee looking to a reduction of the income tax on the production of gold. He hopes to get the depletion clauses so amended as to provide for at least a 50 per cent reduction if not greater. This will be of great interest to the mining industry which has been struggling along under adverse conditions since the war. The propstect for the reduction are quite bright.

Hearings have been arranged with the appropriations committee for increased appropriations for the bureau of mines and the geological survey so that they can do more active advisory work for the mining industry. These bureaus have been hampered by lack of funds from providing numerous publications dealing with the districts on the Mother Lode and including a report on the Alleghany district, a survey of which was made some years ago but never published.

There will be further discussion with the War Department concerning the work of the California Debris Commission and its relation to the hydraulic mining industry.

One of the biggest items in Congressman Englebright's legislative program is the fathering of a bill in the House which promises to be the biggest conservation of natural resources of the West that has been introduced in Congress in a decade. It proposes to provide adequate funds so as to secure ample facilities for forest fire prevention to prevent a repitition of the 1926 fire season which was the most disastrous in the history of the state. Fire prooting of the California and other western forests is of immense benefit to the lumbering industry. In the season just passed an erea from Siskiyou to San Bernardino was burned over causing a loss of millions of acres of timber and millions of dollars.

There were 1467 fires in California alone in the national forests, burning over 681,916 arces while the area under state protection embraced an additional 614,027 acres, which cost a million dollars to check.

The projected bill to be introduced embraces ten major purposes: development and initiation of a sound and economic forest service policy for California; public education to secure a wider recognition of the importance of California forests; cooperation with private agencies to assist the lumbering groups in making their problems better understood; recreational and scenic study to carry out a well coordinated plan of recreational development; to cooperate with the National Park service ;to assist in developing Mt. Lassen, Yosemite, Sequoia and General Grant National Parks; to assist the department of fish and game to work out a sound policy with regard to fish and game; highway tree planting; additional fire patrol lookouts; establishment of additional fire lines and cleaning up of the National Forests.

The bill will have the active support of the California Development Association and the leading civic organizations of the Pacific Coast and it promises to usher in a new regime in the development of our natural resources which will have an enormous influence on the future growth of our state.

Pictures were taken the past summer showing the fire menace and these will form an unanswerable argument in favor of the measure. Mr. Englebright will have the backing of Senator Johnson of California and Senator McNary of Oregon in the Senate who will take the lead in seeing it through that Body.

Mr. Englebright will also have measures for predatory animal control in behalf of the stock industry.

He will also make a drive in Congress for additional federal aid funds for the development of highways in this district. In this connection conferences have been arranged to discuss the status of the Yuba Pass Highway between Downieville and Sierra City and to secure cooperation in securing its early completion. In a series of conferences with the state highway commission he is in perfect agreement on the policy to be pursued on this important highway link.

This conservative bill easily promises to form one of the biggest pieces of legislation to develop in the coming session and its progress will be watched with a great deal of interest. Our Congressman can be depended on to represent in an efficient manner the many and varied interests of the Second District.

MOHAWK SHAFT SINKING WAS RESUMED FRIDAY

Shaft sinking operations at the Mohawk mine were resumed Friday morning after a number of setbacks due to getting through an old water level tunnel filled with muck. Superintendent M. E. Olsen stated that with the soft ground once passed sinking operations would be pushed to reach the 200 foot objective.

An ejector has been rigged up to work with the Cornish rig and keep the hole free of water and muck. The hole is not making much water at present time and the water problem is not considered a trouble some one. As soon as the shaft gets into the solid ground again, Mr. Olsen expects to leave for a brief stay at Yakima, Washington, to recupurate from his recent accident when he broke his left arm. Lyman Weeks will be in charge of operations during his absence.

The Washington interests developing the property have installed a fine surface plant which will make for easy development of the mine when the prospect shaft has been completed to the 200 foot depth. The plans of the Western Mines interests to run the four mile drain tunnel from the Champion mine to Banner Mountain will tap the Mohawk property at a depth of about 900 feet. With the Mohawk practically virgin ground above water level the completion of the Providence drain tunnel will place this property in a particularly advantageous position to develop a real mine, at but slight expense above the 900 level.

COZY CORNER CHAT

NEVADA CITY HAS a great deal to be thankful for at this Thanksgiving season. She sees her great mineral industry getting once more reestablished and on a solid foundation. Gold mining first put Nevada City on the map in the early '50ties and during the lean years that came on during the world war when labor was scarce and high priced and mounting costs of operation put the skids under the industry, our little city had its ups and downs and it looked as if the town might eventually pass into the ghost class, but the indominitable spirit of its citizens bouyed up by the fact that its mineral resources were second to none and that gold mining would come back, carried it through its hard times and now the town is coming back with a vengeance. Five years from now should see Nevada City classed as one of the liveliest towns in the northern part of the state. One of the great factors in her coming rehabilitation will be her becoming the center of the turpentine producing industry of the world in the next few years. Turpentine is one of the prime necessities of life for its many uses in the industrial and pharmaceutical arts and there is a constant demand for it and its numerous byproducts that will make Nevada City turpentine much sought after. Do you know, good people, that these things have all come about since you had your own newspaper to fight your battles for you and advertise your great resources to the outer world? When The Nugget started up two years ago, there was not a stamp dropping in this district, there were many croakers who prophesied that Nevada City would never come back, and in fact that The Nugget would go the way of numerous of its perdecessors. Last week we published the names of the merchants who had not missed an issue of the paper since its inaugural issue and other who started in shortly afterwards and have been behind it in its fight to see Nevada City once more on the map in big letters. To them go the credit for this city having its own newspaper, and to the loyal citizens who have subscribed for it and not read their kind neighbors' papers to keep posted. We are proud of the fact that there are so many public spirited families and business men in our community who are back of their home town paper in such numbers as to make a newspaper possible here. There are other families who ought to be taking the paper, if for not more than to show their interest in their home town but really our circulation has been increasing by such leaps and bounds that we have not been worrying about the non-subscribers so much as to keep the advertising stepping up to keep pace with the subscription list. Every business man in Nevada City ought to carry an advertisement of his business in this paper. Those who have done so have found it to their advantage in many ways, particularly because it has shown that they want to see Nevada City grow and prosper. We are investing our money in Nevada City because we believe it is a good town, it has a bright future and it has a high class of citizenry. We have come here to stay and our business is not for sale at any price not because of any money making ability is might produce in after years but because we think Nevada City is about the best ever. If our people and our business men will get behind us 100 per cent with their subscriptions, advertising and job printing, there won't be much that we will not be able to accomplish in the way of producing a paper that the town will be proud of and that will adequately advertise us to the great outside world.

129 CHURCH ST.

GRASS VALLEY : CALIF.

TYLER JOTTINGS

Mass was celebrated in St. Patrick's church at Cherokee Sunday by Rev. Father O'Rilley of Nevada City and Rev. Father Scott, of Columbia Hill. Father Scott is up in the mountains for the benefit of his health.

Mr. Jack Curnow, Jr., of Grass Valley visited his grandfather and grandfather, Mr. and Mrs. J. Curnow of Cherokee. He was accompanied by Mrs. Sparnom and Herb Curnow all of Grass Valley.

Mrs. C. Cox, Miss Eloise Phelan and Herb Costa were visiting here Monday evening from Nevada City

Mr. Pettit and Mr. M. Wisler have gone below where they have received employment. Mr. M. Wisler is a painter.

James Phelan and Charles Moody are graveling the road into the Siberia mine.

Mr. Buhl of Browns Valley bought some stock cattle from K. J. Phelan.

Miss Violet Meyer has returned to Oakland after visiting her father, H. Meyer.

Ray Meyer of Oakland is visiting friends here.

Mrs. Frances Phelan and sons of Grass Valley and Mrs. Costa and Herb Costa were visitors here Monday.

Cherokee is getting back on the map. She has lots of free water. It being brought to the residents by pipe and the people who own lots are thinking about putting up some bungalows as there is'nt houses enough. If there were a few more they could easily be rented.

Our new neighbors on the Roth ranch caught two large coyotes in their traps last week. Hope they keep the good work up as they have made a bad raid on the young lambs last spring and they are very plentiful here.

Tom Bibelow of the Siberia mine was a visitor in Nevada City Tuesday.

Mrs. Bradbury has returned to the Sberia mine.

Mr. and Mrs. E. Frost made a business trip to Nevada City.

Mrs. H. Meyer and family have moved to the Hughes ranch.

Mrs. K. J. Phelan made a business trip to the county seat Tuesday

Mr. and Mrs. R. Maitland of Represa are visiting her brother T. Phelan of Shady Creek. Mr Maitland is a guard at Folsom prison and is up on his vacation.

Mr. and Mrs. Lee Day and daughters and Mrs. Flynn attended the Pocahontas meeting in Nevada City Monday night.

John Culver of French Corra was visiting his sister, Mrs. R. McNamara of Cherokee on Sunday.

Wedding bells are about to ring in San Juan.

W. P. Clerkin, prominent rancher of the Pike section, was a Nevada City visitor Wednesday and a caller at The Nugget office.

Mrs. Nellie Phelan has gone to Los Angeles where she will visit with Dr. and Mrs. G. H. Roth.

Mike Denike of North San Juan was a business visitor here Wednesday.

Look for Patsy. advt.

WHAT DR. CALDWELL LEARNED IN 47 YEARS PRACTICE

A physician watched the results of constipation for 47 years, and believed that no matter how careful people are of their health, diet and exercise, constipation will occur from time to time. Of next importance, then, is how to treat it when it comes. Dr. Caldwell always was in favor of getting as close to nature as possible, hence his remedy for constipation, known as Dr. Caldwell's Syrup Pepsin, is a mild vegetable compound. It can not harm the system and is not habit forming. Syrup Pepsin is pleasant-tasting, and youngsters love it.

Dr. Caldwell did not approve of drastic physics and purges. He did not believe they were good for anybody's system. In a practice of 47 years he never saw any reason for their use when Syrup Pepsin will empty the bowels just as promptly.

Do not let a day go by without a bowel movement. Do not sit and hope but go to the nearest druggist and get one of the generous bottles of Dr. Caldwell's Syrup Pepsin, or write "Syrup Pepsin," Dept. BB, Monticello, Illinois. for free trial bottle.

ALLISON IS COMMITTED TO STOCKTON ASYLUM

CAMPTONVILLE, Nov. 24. Joseph Allison, who was arrested last week by Sheriff Chas. J. McCoy and Deputy Sheriff Phil Wilcoxin, was sentenced to the state hospital at Stockton by the Superior Court of Yuba county. Allison has acted queer for some time, but was not noticed murh until late when he threatened the life of A. H. Behrens, at which time he was apprehended by the sheriff. It was necessary for Behrens to swear out a complaint after which Allison was examined and committed to the asylum. It was a relief to the local people to have him out of this section of the country. He never should have been here, but became unruly at Marysville where they have officers.

CAMPTONVILLE PERSONALS

Fred E. Aldous left Tuesday for his home at Los Angeles on a short visit.

William Hoeff, of Dobbins passed through town Tuesday enroute to Indian Valley.

Esmond J. Humphrey made a business visit to Indian Hill Mine Tuesday.

Mr. and Mrs. F. W. Camp left Tuesday for Indian Hill Mine, where they will remain this winter.

Albert Jaynes had the misfortune of smashing another of his fingers Tuesday at the Oak Valley saw mill He went to Nevada City for medical attention.

Mrs. T. F. Stewart of Garden Valley was a business visitor in town Tuesday.

Cecil Hegarty of Nevada City was in town Wednesday.

Lee Bullington is at work replacing a roof on the Camptonville post office.

Rev. H. H. Buckner, pastor of the Methodist church at Nevada City, was in town Wednesday.

George Porter of Pike City was in town Wednesday .

J. M. McMahon, who has been supervising the work at the Bald Top Mine, left Wednesday for his home at Lodi. His wife accompanied him. He is an attorney-at-law at Lodi.

Personal

N. B. Bishop of French Corral was a business visitor here Wednesday.

John E. Pond has returned to his home in Burlingame after a short stay here on business.

George A. Rapp of Truckee came down Saturday to attend the funeral of his mother ,Mrs. A. J. Rapp.

Harry G. Rowe, formerly of this city, is here visiting old friends.

Mr. and Mrs. Fred Dooley are home from a visit in Marigold and attending the Legion parade in Marysville on Monday.

Mr. and Mrs. William Clemo of Brentwood are here visiting friends and relatives.

W. E. Moulton, merchant of French Corral, visited the county seat Wednesday.

Things effect people differently. During the sermon some see visions others dream dreams.

"Chemists will win the next war," headline. Why not get the chemists to sign the peace pact?

Chicago plans a 75-story building. That probably means the machine gunners will have to buy range finders.

"Tomorrow" and "When I get around to it" are two mighty poor days on which to do an important piece of work.

A new U. S. cruiser is to be named Chicago. In case of international trouble that ought to paralyze the enemy.

Many of our cares are but a morbid way of looking at our privileges. —Scott.

Advice is like snow—the softer it falls the longer it dwells upon, and the deeper it sinks into the mind.—Coleridge.

A window washer ought to make a good stock salesman. He knows how to use soft soap.

The need of the times is a vehicle you can ride down town and then fold up and carry into the office.—Newark (Ohio) Advocate.

Great is the man who reserves his energy until he knows what he wants to do.

A pinhead ought to be sharp—but usually he isn't.

When a man gets his nose on the grindstone somebody always takes a fiendish delight in turning the handle.

The past is alright to think about occassionally, but the present is the best to live.

We noted a stockingless girl the other day wearing calf skin shoes to match. Now we're wondering if that

CHRISTMAS CLUB IDEA IS GOOD SAYS BANK

The United Security Bank and Trust Company has announced the inauguration of a 1929 Christmas Club which will be available at all its offices and through all its affiliated banks. First to open one of the new accounts was President Leon Bocqueraz of the Bank, and the exampe of the president was followed by officers and employees down to and including junior clerks and messengers. As the weekly payments range from twenty-five cents up, the club is winthin easy reach of all.

Christmas Clubs are planned to help depositors lay aside a stated sum weekly for one year, thus forming a fund available before the ensuing Christmas, and they have become a popular method of saving in California. The United Security Bank and Trust Company has prepared a new and simplified form of account for the 1929 clubs which have just ben opened, and it has been heartily welcomed.

While the campaign to acquaint the public with the clubs has not formally begun the distribution of supplies and information to the branches and affiliated banks was followed by the opening of several hundred acounts, many of them volunteered by officers and employees who saw the advantages of the plan, and others opened by customers who inquired whether the bank would present such a plan this year, as it has in the past.

Horace A. Curnow, Manager of the Nevada City Branch believes this feature of its service is going to be unusually popular this season. When pre-campaign depositors number nearly a thousand, he reasons, the returns to the bank when the public gets the facts will be unusually large, and that means that many thousands of depositors will have Christmas money to spend when the holiday season of 1929 rolls around.

John Thomas of San Francisco spent a few days here renewing old friendships.

Mr. and Mrs. J. R. Kneebone were business visitors in Sonora early in the week.

Mr. and Mrs. James White returned to Bakersfield after attending the funeral of his brother, Alfred White.

Mr. and Mrs. Will White returned to their home in Oakland, Harold White and Mrs .Ruth Kemp to San Francisco after attending the funeral of the late Alfred White.

A man who marries for money generally continues to be a yes man

THE NUGGET INDOOR SPORT COLUMN

JACKSONS AND MOBLEYS ARE TICKETED FOR LEADERSHIP

The championship honors in the Elks bowling league seem to be leaning strongly toward the Jackson aggregation which has three of the leading pin spillers on its team. The Jacksons have now piled up 19 points which barring contingencies looks to be a safe lead to hoid against alll contestants.

The Schreibers and Mobleys are tied for second honors and the Pierces and Tamblyns for fourth while the Nuggets are still secure in the cellar berth. The Jacksons, Pierces and Mobleys each copped three points the past week and look to make another killing the coming wek against their competitors. The lineup of the teams has not turned out at all as per dope sheet and the windup of the present series is sure to show a great change in future tournaments as the teams are too unevenly lined up to insure close competition. Sherm Costello cheated the Nuggets out of an extra point Wednesday night by slipping in a turkey in the closing frames of the game, and saving pin total for his team.

Meyers Mobley is having a runaway race for individual honors and at the pace he is setting is leading the field by a considerable margin. Percy Carr dropped a point and is now in third while Jackson by consistent work climbed up to 155. There is a close race between Hogan and Curnow with only a pin difference while Fouyer and Hegarty are statging a little tie match theinselves. The field is getting well di vided now.

There is talk of challenging the Grass Valley alley shooters to a tournament in the early spring which should make for some good sport as the Valleyites have been at it long enough now to get some real bowlers. An individual tournament is also being talked up.

Acidity

The common cause of digestive difficulties is excess acid. Soda cannot alter this condition, and it burns the stomach Something that will neutralize the acidity is the sensible thing to take. That is why physicians tell the public to use Phillips Milk of Magnesia.

One spoonful of this delightful preparation can neutralize many times its volume in acid. It acts instantly; relief is quick, and very apparent. All gas is dispelled; all sourness is soon gone; the whole system is sweetened. Do try this perfect anti-acid. and remember , is just as good for ...dren, too, and pleasant for them to take.

Any drugstore has the genuine, prescriptional product.

PHILLIPS Milk of Magnesia

DEPARTMENT OF COMMERCE

The study of measures for the safeguarding of the lives and health of the more than 2,000,000 workers in the nation's mining, metallurgical and oil and gas industries formed the major activity of the United States Bureau of Mines in the fiscal year 1928, states Scott Turner, Director of the Bureau, in his annual report made to the Secretary of Commerce. The attainment of increased efficiency in the mining, treatment and utilization of the country's greatly varied mineral materials, whose products are valued at more than six billion dollars annually, also occupied much of the Bureau's attention.

Nearly 50,000 workers in the mineral industries were trained in first air or mine-rescue methods, by the personnel of the Bureau's mine-rescue cars and trucks, establishing a new record in such activities, and bringing the total number so trained by the Bureau since its creation to approximately 250,000. This training was given in 537 mining, metallurgical, quarrying, and oil-producing communities in 36 states and Alaska.

The investigations of the Bureau's mining division included drilling and blastng, loadng of ore, mine timbering, the breaking and handling of ore, mine ventilation, underground transportation, mine sampling methods, and efficiency of mine labor. Special attention was given to geophysical prospecting, that interesting recent development which is making possible the location of hidden mineral deposits. An ever-increasing amount of mineral wealth is being recovered by strippping operations, and the bureau is studying the efficient use of excavating machinery in open cuts. The subsidence of land after mining operations was given attention, notably in the Michigan metal mining region. A study of mining methods and costs in metal mines of the principal mining districts of the United States was begun.

In the field of metallurgy the Bureau continued to contribute to the practical conservation of the nation's mineral resources through the development and improvement of methods for recovering more of the mineral content of ores, with attendant lessening of the cost of recovery. The Bureau continued to take a prominent part in the development of the flotation process, now used successfully in the concentration of immense tonnages of ores which in former years could not have been treated profitably. The problem of the application of this process to the Michigan copper ores was solved by the Bureau during the year, with the promise of substantial'y increasing the recovery of copper in that district, with a notable reduction in production costs.

The Bureau was able to render further service in the improvement of methods for the treatment of complex or low-grade ores of the Western States, a matter vitally effecting the prosperity of those States. The Bureau's experimental iron blast furnace, the only one of its kind in the world, was used in obtaining valuable fundamental data on the smelting of ores. The Bureau continued its efforts to assist in the development of commercial supplies of the different essential mineral materials of which the nation does not possess adequate reserves.

Increased attention is being given to research looking to the more efficient mining, treatment, and utilization of the numerous important nonmetallic minerals, which enter so largely into the construction of buildings and highways.

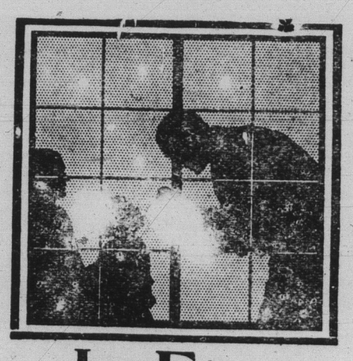
In the effort to stimulate the development of domestic potash, and thus relieve the American farmer of foreign control of that essential fertilizer material, the bureau continued the drilling of test wells in Texas and New Mexico. A number of beds of potash-bearing salts, of varying thickness and value, have been found.

Attention was given to the benefication of the low-grade bauxites of Alabama, Georgia, Tennessee and Mississippi, and the low-grade phosphate ores of Florida. Increasing interest in mica, particularly for radio and electrical equipment, led to a survey of the industry. A study was made of the practicability of substitution of the native yellow, brown and lead ochers and other mineral pigments of California, Oregon and Washington for such materials imported from various foreign countries.

A contract was awarded for the erection of a helium production plant at Soncy, near Amarillo, Texas, where a new supply of helium-bearing natural gas has been found to replace the fast diminishing supply in the Petrolia, Texas, gas field. As the percentage of helium content in the Amarillo field is much higher, it is expected that the cost of helium in the new plant will reach figures lower than any heretofore attained. Supplies of helium sufficient to take care of the requirements of the dirigibles of the Army and Navy for several years to come are believed assured.

In addition to studying the scientific and technical problems of the mineral industries, the Bureau is giving increased attention to economic conditions and problems. This involves the collection and dissemination of statistical data regarding the production, consumption, distribution, and storage of the numerous essential minerals.

As a feature of its work in endeavoring to promote safety and efficiency in the mineral industries, the Bureau of Mines has prepared what is probably the largest collection of educational industrial motion-picture films in the world. These films are intended to explain the different steps in the production, treatment, and utilization of the essential mineral materials, and to illustrate safe methods of mining and preparing minerals.



In Five MILLION HOMES TONIGHT

There are times when all a mother's love can't soothe a fretful baby. No way of telling just what's wrong, yet something must be done. Castoria time! A few drops, and Baby has dropped off to sleep. Yet this marvelous means of quieting a restless infant is utterly harmless. There is not one ingredient but what all doctors know and approve, and would let you give your baby every day in the week. In fact Castoria is *a purely vegetable product*. Gas pains, constipation, even diarrhea can be dispelled in this same manner. Castoria is older than you are, but physicians still say "nothing better for babies." An old-fashioned remedy if you count its years, but parents are old-fashioned who still raise babies without its aid! And at least five million modern mothers keep it handy day and night, for twenty-five million bottles were bought last year! Buy yours *now*; don't wait until you need it.

Children Cry for Fletcher's CASTORIA

How to Play BRIDGE

Series 1928-29 by Wynne Ferguson

Author of "PRACTICAL AUCTION BRIDGE"

Copyright 1928, by Hoyle, Jr.

ARTICLE No. 3

A great deal has been said and written about the importance of knowing the rules and conventions of Bridge. Such knowledge undoubtedly is of prime importance. A proper understanding between partners of the conventions of bidding and play makes better Bridge and more pleasant relations with one's partners, but every player should realize that there are exceptions to all rules. A recent book on Auction expresses the point very well:

"One aspiring to become an expert player must remember this important axiom — There is no *ever* nor *never* in Auction Bridge.

"That is, no rule is too good to be broken when the proper occasion arises. The player who knows best when and how to dispense with a rule, knows best how to play the game. But one thing must never be overlooked. The player must somewhere, somehow, have learned the application of the rule he is breaking, before he attempts to break it.

"When the author uses the word 'never', please read 'hardly ever.' Do not hesitate to break any rule herein set forth *if you see a good reason for doing so* — but be sure your reason is better than the rule."

One of the conventions of bidding that usually should be followed is to bid the major suit, if you have one, in preference to a no trump, but the following hand shows a justifiable departure from this rule or convention:

Hearts — K, 10, 6
Clubs — 10, 3, 2
Diamonds — 9, 8, 5, 2
Spades — K, 8, 3

: Y :
: A B :
: Z :

Hearts — A, 9, 8, 7, 5
Clubs — A, 5
Diamonds — A, J, 4
Spades — A, J, 5

score, rubber game. If Z dealt, should he bid one heart or one no trump?

In this case, the four aces make the no trump bid justifiable, especially as the heart bid contains only one honor. But don't let 100 aces influence you to bid an unsound no trump rather than a sound major suit, when the suit is such a strong one that game is a certainty. On the other hand, don't bid a weak major suit in preference to a sound no trump, especially when the hand contains 100 aces. All pass the no trump bid and A opens the four of clubs.

The play of this hand is instructive also, so should be carefully noted. The fact that A leads the four of clubs, the fourth best of his long suit, and that the deuce and trey of clubs are in the dummy hand, show that A has only four clubs. Therefore Z should win the first club trick with the ace and set his heart suit. He can afford to lose one heart and three club tricks. He will still score game if the spade finesse is successful.

Played in this way, Y Z will make one club, four heart, three spade and one diamond tricks or three odd, game and rubber. Learn to count your tricks and plan the play of the hand before you play to the first trick. It will win you many a game and rubber.

There is another case where conventions should be discarded. That a "two-suiter" always should be played at a suit is one of the recognized conventions of the game; but sometimes there is a better bid, and the following hand is a good illustration:

Hearts — J, 6
Clubs — J, 9
Diamonds — Q, J, 10, 8, 5
Spades — K, 10, 6, 4

: Y :
: A B :
: Z :

Hearts — A, J, 6, 3
Clubs — 10, 5
Diamonds — K, 10, 7, 2
Spades — J, 8, 4

: Y :
: A B :
: Z :

Hearts — K, 9, 7, 4
Clubs — 7, 6, 2
Diamonds — A, Q, J
Spades — K, 10, 7

No score, rubber game. Z dealt, bid one no trump and all passed. A opened the five of spades, Y played the four, B the nine and Z won the trick with the ten of spades. How should Z plan the play of the hand?

Solution: Z should take four rounds of diamonds, winning the third diamond trick in Y's hand with the king so that he can play the last diamond and thus force discards. The important suit to find out about is the heart suit, for if Z takes the wrong finesse, he not only will lose game but also may not even make his bid.

A and B now have two set-up suits, clubs and spades, so Z cannot permit either A or B to get the lead. On the ten of diamonds, B discards a spade and A a heart so Z decides that B must have the queen of hearts. If he also has the ten, Z cannot go game but, if A has the ten, then Z can go game as he can catch B's queen.

As a matter of fact, A held the ten and B the queen, so Z's fine play enabled him to make game on a hand that most players would lose because they would finesse the heart toward the ace jack rather than first coax discards and thus locate the queen. Be on the lookout for such opportunities.

Answer to Problem No. 3

THE HIGH SCHOOL NEWS

Edited by the Students of N. C. H. S.

EDITORIAL

We have been given a wonderful opportunity by the Womens' Civic Improvement Club, which has offered us seventy-five dollars worth of shrubs to improve our school grounds. It will certainly be appreciated by the students, and we feel that all will cooperate with the club. Our grounds are in need of improvements that all the students should be glad to do their best in helping. Everyone can be more careful of his lunch papers and such articles so that they are not thrown around the grounds. The students can help in the planting of the shrubs, and all should be careful not to be destructive after the plants are started. Let's all do our best to show our spirit and help the plan along by valuing such an offer. The Nevada City high school wishes to thank the club for its offer and promises to cooperate in any way possible.

SENIOR NEWS

Mr. Ellsworth of the Commercial Arts and Engraving Company of San Francisco was a visitor at our school on Tuesday, November 20. His company has been given the contract to do the engraving for the "Quill'. He has given us the benefit of a discount of twenty per cent up to March 1, 1929. For this reason the seniors, the class groups, "Quill" staff, and the faculty are planning to have their pictures taken before Christmas in order to have the advantage of the discount. This will certainly be appreciated by the senior class because of the great expense of our annual. It is being discussed among the seniors as to what motif will be carried out in our book. As we are the fiftieth class to graduate from the high school we shall probably make our book the "golden book".

SENIOR CLASS MEETING

The senior class held a meeting on Thursday, November 22, in order to discuss their pictures. Mr. Tyson of the Grass Valley studio was present so the students could select the folders for the photographs. The contract was read and explained to the members. Mr. Tyson has given us a special offer if we have our pictures taken by December 1, to avoid the rush. The contract was accepted, and the style of pictures decided on.

JUNIORS HELD MEETING

At one o'clock, Tuesday noon, November 20 ,the juniors held a meeting in Mr. Kjorlie's room. The reason for the meeting was to decide about class rings, the choosing of which had been delayed because of the juniors, not paying their student body dues. The juniors decided on the rings, which they will buy through Mr. Hartung. Mr. Hartung requests that half payment be given with a note from the pupil's parents authorizing them to buy rings.

Come on now, juniors, and pay your money. We have had a long enough delay already. Let's all get together and buy our rings.

JOKES

Dorothy: "Ouch, I just bumped my crazy bone."

Thelma. "Never mind, just comb your hair differently and the bump won't show."

Miss Hoffman: "Myrel, why don't you answer me".

Slim: "I did, Miss Hoffman. I shook my head."

Miss Hoffman: "But you don't expect me to hear it up here, do you?"

Miss Hoffman: "Bob, tell me some things about John Milton."

Polly: "Well, he got married and he wrote "Paradise Lost". Then his wife died, and he wrote "Paradise Regained".

Addison: "I could dance on like this forever."

Melba: "Oh. don't say that. You're bound to improve."

Devnes: "What do you consider the height of extravagance, Tom?"

Tom: "Well let's see, you're five feet eight inches, I should judge."

CIVICS CLASS PICNIC

The civics classes of Nevada City high school had a picnic Monday evening, November 19, at Sugar Loaf. The faculty members were invited. A bonfire was built, over which weenies were roasted and marshmallows were toasted. The whole crowd then went to the bottom of Sugar Loaf and played games The party ended at 7 o'clock. Everyone reported a good time.

STAFF CHOSEN

The following people have been chosen as the newspaper staff for the next two weks. editor, Byron Jane, senior reporter, Gus Hanks; junior reporter, Thelma Boreham; sophomore reporter, Cecelia Glasson; freshman reporter, Nadine Neagle.

BASKETBALL

Because of the fact that Nevada City and Grass Valley "A" squads will not be able to meet until the C. I. F. league games start, the "D" teams of both towns will play the "A" teams scheduled games.

Tuesday night, November 20, the "D" boys went to Grass Valley to play the team from that town. The game was fast an dhard fought. The final score was 5 to 4 in favor of Nevada City.

CAMP FIRE MEETING

The Shishiwa group of Camp Fire Girls met at 7 o'clock Tuesday November 20, at the Methodist church for the purpose of practicing camp fire songs.

CLUB GIVES GIFT

Mrs. C. E. Parsons addressed the student body on Wednesday, November 21, in behalf of the Womens' Civic Improvement Club. She stated that the club was willing to spend seventy-five dollars for shrubs to be planted on the school grounds. Mrs. Parson aked the opinion of many of the students, who were in favor of the plan. When she asked the boys to volunteer in planting the shrubs they responded enthusiastically. It is hoped the plan will mature in the near future.

SCHOOL HAS MOVIES

The student body was entertained Friday, November 23, with a three reel historic movie. It was entitled "Yorktown" and described the Revolutionary War. The portrayal of the strange customs of the people, the surrender of Cornwallis, and the assistance of the French people during the war, was very enjoyable. The showing of the pictures proved to successful that plans are being made to have more performances in the near future.

JOKES

Poor Nadine's mind is in a very upset condition, because the only thing she can think of is that "certain party". The other day she was heard repeating over and over again. "Oh, Polly, Oh, Polly". Her alibi is that she was saying, "Oh, Golly—" but who is going to believe that!

Henry Ponticelli of Alleghany was a visitor here Tuesday.

Mr. and Mrs. K. J. Phelan of Tyler were visitors here ednesday.

Robert Davis of Forest spent a few days here visiting his family.

F. C. Austin of Alleghany was in this city over the wek end.

Gordon Wood of Pike City was in Nevada City Thursday.

Charles Smith of Sierra City is visiting relatives in Nevada City.

AMONG OTHER THINGS

The betting on the big game was slightly in favor of Stanford this last week, although the California supporters were able by a heroic measure to keep the odds about even.

When this went to press the result of the game was still unsolved but when you read this you will have already known the final score. Then you will be able to tell if you have bet foolishly or not. Not that it will make any difference anyway.

Personally this writer is very much in favor of California and has stood by his opinions accordingly. Others, including that lady, famous over many a mile as one who has no compunction in indulging in the so called love quarrels in public (yes, I mena you, daughter) are for Stanford, showing that their mercenary instinct far outweighs their finer feelings, such as patriotism the better school.

When the Game is over there will be a great wailing and gnashing of teeth among the Stanford gang, and it is only fit that they who make the greatest noise now should make the greatest in that glorious future.

We learned Wednesday that if one had only known, we could have had an extended holiday due to the lamented and utterly unaccounted for loss of the School, due to the burning of lunch papers.

The school was promised some improvements by the Improvement Club Wednesday. The noise made by the contact of the enthusiastic hands of the student body was indeed deafening they applauded this quixotic attempt to help them; BUT when the spokesman asked the aid of the boys in preparing the ground you could have heard a pin drop. Such was the surprise of the student body in being asked to do something other than what was destructive.

The following people from the Nevada City high school went to Berkeley for the big game: Miss Leschinsky, Miss Taylor, Beatrice Cassidy, Helen Chapman, Nancy Jones and Bill and Margaret Rector.

Great dramatic talent was unexpectedly evinced by our senior reporter of this week, when he interpreted the role of Tong in "She Stoops To Conquer".

LEGAL NOTICE

M. A. No. 023187, United States Land Office, Sacramento, California, September 18, 1928. Notice is hereby given that Nan McInteer of 24 MacArthur Ave., San Francisco, Cal., has made application for patent for the Brackett Lode Mining Claim, Survey No. 5910, in Sec.. 20, T 16 N., R 9 E., M. D. M., in the Nevada Mining District, Nevada County, California, described as follows: Beginning at corner No. 1, Brackett Lode, whence the quarter-section corner on the north line of Sec. 20, T. 16N., R. 9 E., M. D. M., bears N. 19° 35' E. 919.47 feet, thence N. 88° 10' W. 1468.55 feet to corner No. 2 of said lode. thence S. 1° 07' E. 500 feet to corner No. 3 of said lode; thence S. 89° 45' E. 1467.01 feet to corner No. 4 of said lode; thence N. 1° 07' W. 459.41 feet to point of beginning. The conflicting claims are Lot 82, Mayflower Placer (conflict with which is excluded), and Survey No. 5714, Greenman Placer. The only adjoining claim is Survey No. 5714, Enterprise Lode. The location notice is recorded in Book 21, pages 406 et seq., mining claims, Nevada County, California.

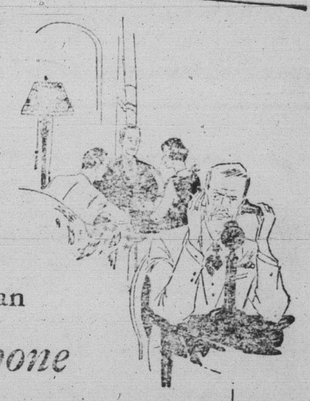
When privacy is needed—



The answer is found in an *Extension Telephone*

When guests are in your home, the telephone rings . . . Dr. Whitcomb is wanted. He lays down his hand of bridge and goes to your telephone.

It is a professional conversation. Must he carry it on in the embarrassed hearing of all his fellow-guests? Or may he step to an *extension* telephone, in another part of the house?

An extension to the main telephone costs but a few cents a day.

THE PACIFIC TELEPHONE AND TELEGRAPH COMPANY

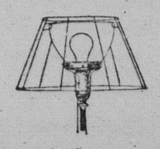
25% of our school children have defective eyesight—caused, chiefly, by poor lighting

What are you doing to correct this condition in your home?

Most homes have beautiful lamps, but they give poor light.

The best lighting is that which is nearest to ordinary daylight—sufficient light without glare, evenly distributed throughout the room.

The lamp illustrated here meets these requirements. It doesn't hurt the eyes. It improves the colors of furniture and draperies. Friends love to linger in the soft, complimentary light.



The shade rests on closed top of glass globe which surrounds lamp and diffuses raw light.

The lamps (both floor and table) have an opal glass reflector under the shade that diffuses the light. They come with a selection of silk and parchment shades. But you can never know how it improves vision and the appearance of the room until you try one. We'll gladly loan you one for a trial. Phone or drop us a card.

A modern ceiling unit is also illustrated here.

at the movies

The new plan of announcing the film shows for the week at the Broadway Theatre through The Nugget has proved a happy one so far, according to Manager W. V. Tamblyn. Some excellent shows are being booked for this popular playhouse and our citizens should give it all their support to encourage more and better pictures all the time.

The following is the program for this week.

MONDAY— "The Vanishing Pioneer", with Jack Holt.

TUESDAY and WEDNESDAY— "Across to Singapore", starring Navarro and Crawford. "Our Gang," Comedy.

THURSDAY—Tom Mix in "Painted Post."

FRIDAY—"In a Moment of Temptation." A new serial just starting, "The Vanishing West". Also "Alice Cuts In".

SATURDAY— "Wickedness Preferred", with Lew Cody and Aileen Pringle.

SUNDAY and MONDAY—"Happiness Ahead", with Colleen Moore. Comedy "Pirates Beware."

A coming attraction will be "Wings", the epic of the air service.

THOMPSON-LAVEZZOLA NUPTIALS ARE CELEBRATED

The wedding of Mrs. Ruby Thompson daughter of Mrs. Henry Huckins of North San Juan, and Mr. Joseph Lavezzola of Downieville,, was queitly celebrated yesterday afternoon at the bride's home in the presence of the immediate family and a few intimate friends. The Rev. H. H. Buckner pronounced the magic words that united this popular couple.

The bride was attractively gowned blue taffetta and carried a bouquet of pink sweet peas. The groom wore his usual smile. They were attended by Mr. and Mrs. Acton M. Cleveland. The happy couple will make their home at Downieville where the groom has fitted up a cozy home

The bride has made her home on the Ridge for some years and has a wide circle of friends who wish her every happiness. She has been the faithful correspondent of The Nugget for the past two years. The groom is one of the popular young men of the upper country.

ENGLEBRIGHTS DEPART FOR WASHINGTON FOR WINTER

Congressman and Mrs. Harry L. Englebright left Saturday noon for Washington where Mr. Englebright will be in attendance at the short session of Congress as the representative of the Second District.

HOUSEWARMING IS GIVEN THE LOUIS ELKUSES 1

A combined housewarming and celebration of their ninth wedding anniversary was given Mr. and Mrs. Louis Elkus last week at their new home on Park Avenue. It was a surprise staged by sixteen friends who came arrayed in hard times costumes. Music and cards were enjoyed and midnight supper was served A huge wedding cake was the piece de resistance and room decorations were in green. Pize awards went to James Nankervis and Mrs. Ralph Norris.

DELPHIAN CHAPTER HEARS TALK BL MRS. BARRY.

Mrs. Annie L. Barry of Berkeley was the speaker at the meeting last week of the Nevada County Delphian Chapter, taking for the subject foreign affairs in some of the other countries and renewing several late books. Mrs. Jane Hutchison gave a talk on Schubert's life, Mrs. Charles Elliott sang two Schubert numbers and Mrs. A. B. Foote a number while Miss Minnie played Second Impromptu.

The Alleghany and Forest stage is now operating on the winter schedule leaving Nevada City at 7 a. m. instead of 1. This will be in force until spring.

LEGAL NOTICE

The California Debris Commission will hold a public hearing at 11:00 A. M., December 11, 1928 in Room 7 8 Wells Fargo Bldg., San Francisco, California, to receive protests against granting the application of Mayflower Mining Company to mine by the hydraulic process about 1,500 cubic yards, located at the head of Brushy Creek draining into Shirt-tail Creek, thence into North Fork of American River, and to impound tailings alongside Brushy Creek about one-half mile below the mine.

THE SOCIAL WHIRL

EASTERN STARS INSTALL NEWLY ELECTED OFFICERS

Evangeline Chapter. No. 9,, Order of Eastern Star installed its officers for the coming year on Tuesday evening with a large attendance of members and visitors. Mrs. Jane D. Hutchinson, outgoing Worthy Matron, acted as installing officer assisted by Mrs. Emily Tamblyn as marshal.

The following officers were inducted into their respective stations:
